

How do I Measure my Caravan?

Good question and one that is asked all the time.

To measure your caravan, you simply measure from the rear most point of the the caravan to the front but you must EXCLUDE the A Frame or hitch. The A frame is not covered and is therefore not included in the measurement of your caravan.

If your caravan measures 20ft, you would need a 19ft to 21ft caravan cover.

If your caravan measures 21ft, we recommend you select the larger 21ft to 23ft cover as the smaller one could be a little too tight.
